Sarah K Shultis

shultis.sk@gmail.com | 540.460.0466 | https://github.com/skshultis

A web developer with a straightforward, purpose-driven approach to problem solving and a tenacity for data and research.

DEVELOPMENT EXPERIENCE

Web Development Immersive Student – *June – September 2016*

General Assembly, Washington, DC

A web development immersive program that focuses on teaching the latest technologies, frameworks, and design approaches, while encouraging students to teach themselves new material in order to enable entry into the development industry. Projects include:

dcCrimeMapper

An interactive map of violent criminal activity in Washington, DC in the last 30 days, populated by the District of Columbia Open Data API. This project utilized Javascript, Mapbox, Python, and Excel. The current version was created in a week, and plans for continued development include enabling users to analyze recent criminal activity against other local events such as festivals and federal holidays.
